NEWS

IN THIS ISSUE MEMBERS & RALLIES

President's Corner

by Dale Prichard

Dear Members, it been well over 2, months since the last Hot Flash Newsletter. Since that time, rallies have happen, people have traveled our summer newsletter has been published along with hearing from our many members.

Members Hot Flash Bulletins:

Let's start with the many emails I have received from some of our members related to the latest mods:

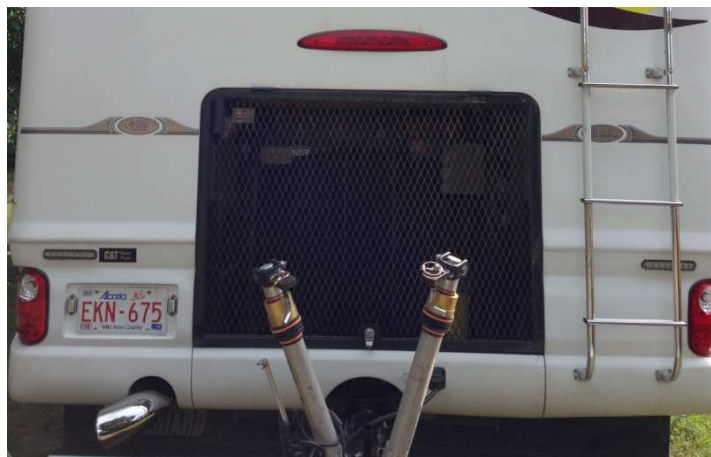

Armand, had been worrying about front end damage, so he sent in this mod:

Still busy it's always upset me that we had this big fancy motorhome that had this beautiful front end cap on it but really no protection a 1 mile an hour tap to anybody's little vehicle and we have \$5-\$10,000 damage or generator crushed our batteries falling out total disaster so I added some square 2 inch tubing quarter-inch thick and design the little bumper read that easily slides off in 30 seconds to give you access to the battery compartment yet will easily take a five mile hour crash and survive.

For those of you who would like additional information you may contact me and I will send you the instructions to his mod.

Another one of his mod was a redesigned rear engine door check it out.
